CAREER OBJECTIVE

Computer Science graduate with hands-on experience designing and deploying AI applications using Python, FastAPI, Streamlit, and modern LLM technologies. Built retrieval-augmented generation (RAG) systems, semantic search applications, and machine learning solutions with a focus on practical problem solving. Interested in software engineering and applied AI roles.

EDUCATION

Bachelor of Technology – Computer Science and Technology - CGPA : 7.6 *2022 - 2026*
School of Engineering & Technology, Shivaji University, Kolhapur
HSC (Class XII) - Shivaji Mahavidyalaya, Udgir - Percentage : 60% *2021 - 2022*
SSC (Class X) - S.S. Madhyamik Vidyalaya, Sukani - Percentage : 94% *2019 - 2020*

TECHNICAL SKILLS

Languages: Python, SQL, C++
AI / Machine Learning: Scikit-learn, TensorFlow, XGBoost, NLP
LLM Engineering: RAG, LangChain, Sentence-BERT, Vector Databases, Prompt Engineering
Backend: FastAPI, REST APIs
Visualization: Power BI, Streamlit, Excel
Tools: Git, GitHub, Google Colab, Jupyter Notebook
Soft Skills: Quick Learner, Communication, Team Collaboration, Problem-Solving

INTERNSHIP

Labmentix Pvt. Ltd **June 2025 – Sep 2025**
Data Science with AI Intern

- Built machine learning solutions for healthcare, retail, and finance datasets using Python and Scikit-learn.
- Designed Streamlit applications to visualize predictions and improve model usability.
- Improved model performance through feature engineering and hyperparameter tuning.

PROJECTS

HydroGPT – AI-Based Hydropower Forecasting System | GitHub Repo

- *Teck Stack - Python, FastAPI, Streamlit, LLaMA 3, Groq API, RAG, ReAct Agent, ChromaDB*
- Designed an AI-powered hydropower forecasting assistant combining retrieval-augmented generation with Llama 3.
- Built document ingestion, embedding generation, and semantic retrieval pipeline using ChromaDB.
- Developed FastAPI backend and Streamlit frontend for interactive natural-language forecasting.
- Implemented ReAct-based reasoning workflow for contextual question answering.

AI Resume Screener – Semantic Job Matching System | GitHub Repo

- *Tech Stack - Python, Streamlit, Sentence-BERT, LLaMA 3, Groq API, Scikit-learn, PDFPlumber, python-docx*
- Built semantic resume matching engine using Sentence-BERT embeddings.
- Ranked resumes using cosine similarity instead of keyword matching.
- Generated candidate evaluation reports using Llama 3.
- Automated resume parsing for PDF and DOCX files.

ACHIEVEMENTS

- GirlScript Summer of Code 2024 Extended – Ranked AIR 471 with 2 merged pull requests.
- Completed Accenture and Tata virtual consulting simulations.

CERTIFICATIONS

- Python for Data Science, AI & Development – IBM
- IBM Data Science Professional Certificate.
- TCS iON Career Edge – Young Professional
